

Find and Replace With sed Command

➤ Syntax:

- `sed [options] 'commands' fileName`
- `sed 's/SearchString/ReplaceString/g' fileName` → Defaults to stdout
- `sed -i 's/SearchString/ReplaceString/g' fileName` → Edits the original file
- `sed -i.bak 's/SearchString/ReplaceString/g' fileName` → Take backup and edit
- **Note:** we can take any delimiter in find and replace of sed command but make sure that it's a single character
- **Example:** take `|` in place of `/`
 - `sed 's|SearchString|ReplaceString|g' fileName`
