

**break and continue statements for loops**

**Learn How to Automate Repetitive Tasks with **Bash** Shell Scripting**

## break and continue statements

- These two statements must be used only inside loops
- **break:**
  - break is used to stop the loop ; we can use this with or without condition
  - Note: Be clear it will stop only loop not a shell script
- **Continue:**
  - It will skip current iteration/execution and move to the next iteration
